

i have been a flight attendant for 34 years and i believe the use of cell phones in flight is a very bad idea. the airplane is a very confined space with no room to change your location should you find the person next to you actions are loud and annoying. the general public has to deal with enough problems on a airplane without adding to the mix of 3 or 4 people sitting within 3 feet of you all talking loudly on thir cell phones while you are trying to take care of some business or sleep. please don't give flight attendant one more issue to deal with on the airplanes.
